

NETAPP UNIVERSITY

# SAN Implementation—Switch Configuration

## COURSE DESCRIPTION

In the SAN Implementation—Switch Configuration course, you learn to configure Fibre Channel (FC) and IP storage area network (SAN) switches. You learn about the need for zoning and about the two methods that are used to zone an FC switch. In addition, you learn about the virtual LANs (VLANs) that are used when IP SAN switches are configured and about the virtual SANs (VSANs) that are used when FC switches are configured.

This course contains an assessment and a passing score of 80% or better is considered a successful completion.

## DELIVERY TYPE

- Web-based training (WBT)

## DURATION

- 1 hour

## AUDIENCE

This course is intended for professional services engineers and professional services partners.

## TRAINING UNITS

- 1

## PREREQUISITES

- SAN Fundamentals on Data ONTAP (WBT)
- SAN Design (WBT)

## OBJECTIVES

By the end of this course you should be able to:

- Identify the steps to configure a Brocade or Cisco Fibre Channel (FC) SAN switch
- Identify the steps to configure a Cisco iSCSI (IP SAN) switch
