

NETAPP UNIVERSITY

# Introduction to Cluster-Mode for 7-Mode Administrators

## COURSE DESCRIPTION

This course prepares Data ONTAP® 7G and Data ONTAP 7-Mode administrators for Data ONTAP operating in Cluster-Mode.

## DELIVERY TYPE

Web-based training

## DURATION

One hour

## AUDIENCE

Data ONTAP 7G and Data ONTAP 7-Mode administrators who want to implement Data ONTAP operating in Cluster-Mode

## TRAINING UNITS

Free

## PREREQUISITES

Administrative knowledge of Data ONTAP 7G and Data ONTAP operating in 7-Mode

## OBJECTIVES

By the end of this course, you should be able to:

- Describe the Data ONTAP 8.1 operating system
- Identify the features of and advantages of using Data ONTAP 8.1 operating in Cluster-Mode
- Compare the physical and logical architectures of Data ONTAP operating in Cluster-Mode with the physical and logical architectures of Data ONTAP 7G
- Discuss the approaches that are appropriate for migrating hardware and data from Data ONTAP 7G or Data ONTAP operating in 7-Mode to Data ONTAP operating in Cluster-Mode
- Explain how the interfaces of Data ONTAP 7G and of Data ONTAP operating in 7-Mode differ from the interface of Data ONTAP operating in Cluster-Mode
- Discuss the maintenance approaches that are appropriate for Data ONTAP operating in Cluster-Mode

## PRICING AND CANCELLATION POLICY

For pricing and cancellation information, see the NetApp University LearningCenter.

**NOTE:** If you are registering for this course with an Authorized Learning Partner, review the partner's pricing and cancellation policy.
