

# NetApp Hybrid Cloud Associate Accreditation Exam

Delivery: Accreditation

Duration: 1.5 hours

## Course Description

The NetApp® Hybrid Cloud Associate Accreditation Exam validates a candidate's ability to recognize and explain how NetApp provides value to customers and partners by managing data in a cloud environment. Note the following:

- The main audience is expected to be sales representatives.
- The level of expertise is foundational and introductory.
- The exam is free and open to customers, partners, and employees.
- To all who pass the 40-item exam, a NetApp Accredited Associate digital badge is issued for sharing across all social platforms.

## Candidates should be able to perform the following tasks:

- Differentiate between NetApp products and solutions
- Differentiate between file, block, and object storage technologies
- Identify various data center infrastructure models
- Explain virtualization concepts
- Understand disaster recovery, backup, tiering, and business continuity
- Use the Interoperability Matrix Tool (IMT) and Hardware Universe

## Candidates should be familiar with the following:

- The NetApp BlueXP™ suite of products
- [cloud.netapp.com](https://cloud.netapp.com)
- NetApp Active IQ®
- [docs.netapp.com](https://docs.netapp.com)
- [mysupport.netapp.com](https://mysupport.netapp.com)

## Role

Foundational skills across any role

## Recommended Training
