

Installing and Configuring the ASA A70, ASA A90, and ASA A1K Systems

Delivery: Web-based training (WBT)

Duration: 60 minutes

Course Description

Explore the configuration options and architectural components of the NetApp® ASA A70, ASA A90, and ASA A1K storage systems. Examine the installation, preparation, and cabling guidelines that are specific to these systems. This course serves as a valuable reference guide on the job.

Role

Installation engineer

Prerequisites

Universal AFF and FAS Installation (WBT) course or previous NetApp FAS, AFF, and All SAN Array (ASA) hardware installation experience

Objectives

This course focuses on enabling you to do the following:

- Identify the technical features, configuration options, and field replaceable units (FRUs) of the ASA A70, ASA A90, and ASA A1K storage systems
- Install and cable the ASA A70, ASA A90, and ASA A1K storage systems according to NetApp recommended practices
- Verify that the newly installed ASA A70, ASA A90, and ASA A1K storage systems are functioning properly

Course Content

This course includes the following modules:

Modules

- Introduction to ASA A70, ASA A90, and ASA A1K storage systems
- Installation and configuration setup
