

Installing and Configuring the AFF C80 System

Delivery: Web-based training (WBT)

Duration: 60 minutes

Course Description

Explore the configuration options and architectural components of the NetApp® AFF C80 storage system. Examine the system's installation, preparation, and cabling guidelines. Use this course as a valuable reference guide in the field.

Role

Installation engineer

Prerequisites

Universal AFF and FAS Installation (WBT) or previous NetApp FAS, AFF, and ASA hardware installation experience

Objectives

This course focuses on enabling you to do the following:

- Identify the technical features, configuration options, and field replaceable units (FRUs) of the AFF C80 storage system
- Install and cable the AFF C80 storage system according to NetApp recommended practices
- Verify that a newly installed AFF C80 storage system functions properly

Course Content

This course includes the following modules:

Modules

- Introduction to the AFF C80 storage system
- Installation and configuration setup
