Learning Services Academy

Servicing the AFF A1K System

Delivery: Web-based training (WBT) Duration: 60 minutes

Course Description

Explore the technical specifications and features of the AFF A1K system. Locate and identify the key components of the system and examine the procedures for replacing the field replaceable units (FRUs).

Role

Support engineer, implementation engineer, and professional services

Prerequisites

Installing and Configuring the AFF A70, AFF A90, and AFF A1K Systems

Objectives

This course focuses on enabling you to do the following:

- Understand the technical features of the AFF A1K system
- Locate and identify the system components
- Replace components such as batteries, adapters, electronic modules, and media

Course Content

This course includes the following topics and lessons:

Topics	Lessons
Identify the AFF A1K system	• Review the technical and physical specifications of the AFF A1K system • Identify the key components of the AFF A1K system • Identify the AFF A1K FRUs and their physical locations
Replace a boot media device	Follow steps to replace and restore a boot media device for an AFF A1K storage system
Replace a controller module	Follow steps to replace a controller module for an AFF A1K storage system
Replace a DIMM	Follow steps to replace a DIMM in the controller module for an AFF A1K storage system
Replace a fan	Follow steps to replace a fan in the controller module for an AFF A1K storage system
Replace an NVRAM module	Follow steps to replace an NVRAM module for an AFF A1K storage system
Replace an NV battery	Follow steps to replace an NV battery for an AFF A1K storage system
Add or replace an I/O module	Follow steps to add or replace an I/O module to an AFF A1K storage system
Replace the power supply	Follow steps to replace the power supply for an AFF A1K storage system
Replace an RTC battery	Follow steps to replace an RTC battery in the controller module for an AFF A1K storage system
Replace a system management module	Follow steps to replace a system management module for an AFF A1K storage system
