

NETAPP UNIVERSITY

FAS3200 and V3200 Series Troubleshooting

COURSE DESCRIPTION

Learn the procedures for replacing faulty field replaceable units (FRUs) of the NetApp® FAS3200 and V3200 (FAS/V3200) series storage systems through this interactive course. This course describes the system diagnostics features of the FAS/V3200 series.

Through lectures and demonstrations, you learn to troubleshoot the FAS/V3200 series successfully and provide effective support.

DELIVERY TYPE

Web-based Training (WBT)

DURATION

1 hour

AUDIENCE

NetApp, partner and customer employees who configure and troubleshoot the FAS3200 series.

TRAINING UNITS

None

PREREQUISITES

- None

OBJECTIVES

By the end of this course, you should be able to:

- Troubleshoot common errors with the FAS/V3200 series
- Apply best practices for diagnosing errors on the FAS/V3200 series
- Replace field replaceable units on the FAS/V3200 series
