

NETAPP UNIVERSITY

Basic NetApp Configuration and Administration

Abstract

This two-day course provides a technical overview of the features and benefits of NetApp ONTAP 9 data-management software. The course enables you to explain the architecture and functionality of an ONTAP cluster. The course also introduces basic administration, configuration, and management of an ONTAP cluster.

Through hands-on exercises, you learn how to create a cluster, aggregates, storage virtual machines (SVMs), LIFs, FlexVol volumes, and Snapshot copies.

Objectives

This course focuses on enabling you to do the following:

- List the steps to create and configure a cluster
- Identify the methods to manage a cluster
- Describe IPspaces, broadcast domains, and subnets
- Describe SVM benefits, components, and features
- Describe FlexVol volumes and efficiency features
- Describe methods to access files in a cluster

Prerequisite

A basic knowledge of storage networking

Delivery Type

Virtual instructor-led training (VILT)
Instructor-led training (ILT)

Duration

Two days

Audience

Employees, Partners and Customers

Training Units

24

Language

English
