

NETAPP UNIVERSITY

Data ONTAP 7-Mode Administration

COURSE DESCRIPTION

Welcome to the Data ONTAP 7-Mode Administration course. Data ONTAP 8 is the next generation data storage operating system from NetApp. Data ONTAP 8.1 builds on the stability and reliability of the Data ONTAP 8 operating system and provides new functionality that sets it apart from all of the competition. This five-day instructor-led course will enable you to perform basic support and administrative functions on a NetApp storage system running the Data ONATP 7-Mode operating system.

DELIVERY TYPE

Instructor-led training (ILT)

DURATION

5 Days

AUDIENCE

Customers, employees, and partners

TRAINING UNITS

60

PREREQUISITES

- Students attending this course should have a background in system administration for one of the following operating systems: UNIX or Windows
- Data ONTAP 7-Mode Fundamentals (WBT)

OBJECTIVES

By the end of this course, you should be able to:

- Identify the different components that comprise a NetApp storage environment
- Install and perform the setup configuration of Data ONTAP
- Perform basic administration on a storage system
- Explain and configure physical and logical storage
- Identify and configure client protocols
- State virtualization techniques available in Data ONTAP
- Describe Snapshot copies and space consumption in Data ONTAP
- Discuss backup methods available in Data ONTAP
