

# Introduction to AFX

Delivery: Web-based training (WBT)

Duration: 10 minutes

## Course Description

Are you curious about how NetApp® can help modern businesses manage massive amounts of data quickly and efficiently for their artificial intelligence (AI) and machine learning (ML) workloads? This short course introduces you to the NetApp AFX disaggregated storage system built for the AI-powered enterprise—what it is, why it matters, and how it can benefit your organization. Learn about its core features, the business value that it delivers, and the real-world scenarios where it shines. By the end of this course, you should be ready to have meaningful conversations about the value of AFX.

## Role

Sales, customer success manager, solutions engineer (SE), architect, administrator, operator, support engineer, implementation engineer, and professional services

## Prerequisites

*Introduction to Disaggregated Architecture*

## Objectives

This course focuses on enabling you to do the following:

- Describe an AFX system
- Explain AFX business benefits and advantages
- Identify AFX use cases

## Course Content

This course includes the following lessons:

### Lessons

- AFX overview
- AFX business value
- Use cases for AFX
