NetApp

NetApp Console Fundamentals

Delivery: Web-based training (WBT) Duration: 60 minutes

Course Description

Learn how NetApp® Console delivers unified, intelligent administration through its AI-driven control plane to manage storage systems and data services, across on-premises and cloud environments. Discover how its intuitive user experience with easy onboarding, actionable dashboards, automated workflows, proactive monitoring, and toolset integration drive simplified, faster operations. Explore how it is secure by design—with identity-based access, least privilege roles, resource hierarchy, and auditing—which meets compliance and regulatory requirements and ensures security without compromise.

Role

Systems administrator, implementation engineer, and technical support engineer

Prerequisites
