

NETAPP UNIVERSITY

# Data ONTAP 8.1 7-Mode New Features

## COURSE DESCRIPTION

Data ONTAP® 8 is the next generation data storage operating system from NetApp. In this Web-based course, you learn the similarities and differences between NetApp® Data ONTAP 7.x and the new Data ONTAP 8.1 7-Mode operating systems. You explore new features, including support for IPv6, Microsoft® Server Message Block 2.0 (SMB2), and SnapLock® compliance software; NetApp DataMotion for MultiStore® vFiler® secure partitions; and support for MetroCluster™ software with SAS disk shelves, encryption, and compression.

## DELIVERY TYPE

Web-based training (WBT)

## DURATION

1.5 hours

## AUDIENCE

The intended audience is professional services engineers and customers who are considering an investment in the Data ONTAP 8.1 operating system.

## TRAINING UNITS

None

## PREREQUISITES

None

## OBJECTIVES

By the end of this course, you should be able to:

- Provide an overview of the architecture of NetApp Data ONTAP 8.1 7-Mode operating system
- Explain encryption and compression
- Explain support for IPv6 and SnapLock compliance software
- Describe NetApp DataMotion for MultiStore vFiler secure partitions
- Describe support for MetroCluster software with SAS disk shelves
- Describe the purpose of NetApp OnCommand™ unified manager
- Explain AutoSupport™ tool updates
