

NETAPP UNIVERSITY

# Data ONTAP Cluster-Mode Fundamentals

## COURSE DESCRIPTION

Welcome to the Data ONTAP Cluster-Mode Fundamentals course. Data ONTAP® 8 is the next generation data storage operating system from NetApp®. Data ONTAP 8.1 builds on the stability and reliability of the Data ONTAP 8 operating system and provides new functionality that sets it apart from all of the competition. This Web-based course describes the benefits of Data ONTAP 8.1 Cluster-Mode. This course enables you to explain the architecture and functionality of a Data ONTAP 8.1 cluster and to perform basic administration tasks, including installation, configuration, management, and troubleshooting. This information provides a solid foundation for anyone who plans to work with Data ONTAP 8.1 Cluster-Mode.

## DELIVERY TYPE

Web-based training (WBT)

## DURATION

Five hours

## AUDIENCE

NetApp Professional Services, employees, partners and customers

## TRAINING UNITS

Five

## PREREQUISITES

- Working knowledge of network attached storage and SAN
- Data ONTAP 7-Mode Fundamentals (WBT)

## OBJECTIVES

By the end of this course, you should be able to:

- Describe the Data ONTAP 8.1 architecture
- Identify the primary benefits of Data ONTAP and explain both Cluster-Mode and 7-Mode
- Enumerate and describe the steps for setting up a cluster
- Manage NAS and SAN in a cluster
- Administer mirroring and data protection for a cluster
- Perform basic troubleshooting of a cluster

## PRICING AND CANCELLATION POLICY
