

NETAPP UNIVERSITY

Architecture, Configuration, and Implementation of Flash Pool

COURSE DESCRIPTION

This course describes the architectural components, configuration steps, and implementation best practices for Flash Pool. It also includes demonstrations that illustrate the configuration processes for 7-Mode and for Cluster-Mode.

DELIVERY TYPE

WBT

DURATION

60 minutes

AUDIENCE

NetApp employees, partners, and customers

TRAINING UNITS

None

PREREQUISITES

- ABCs of Virtual Storage Tier

OBJECTIVES

By the end of this course, you should be able to:

- Describe the architectural components of Flash Pool
- Identify the benefits of Flash Pool, including performance benefits during a failover
- Configure Flash Pool for Data ONTAP operating in 7-Mode and in Cluster-Mode, including disk-shelf configuration
- Identify the appropriate use cases for Flash Pool as opposed to Flash Cache
- Explain the best practices for implementing Flash Pool

PRICING AND CANCELLATION POLICY
